## Experiment Setup and Configuration

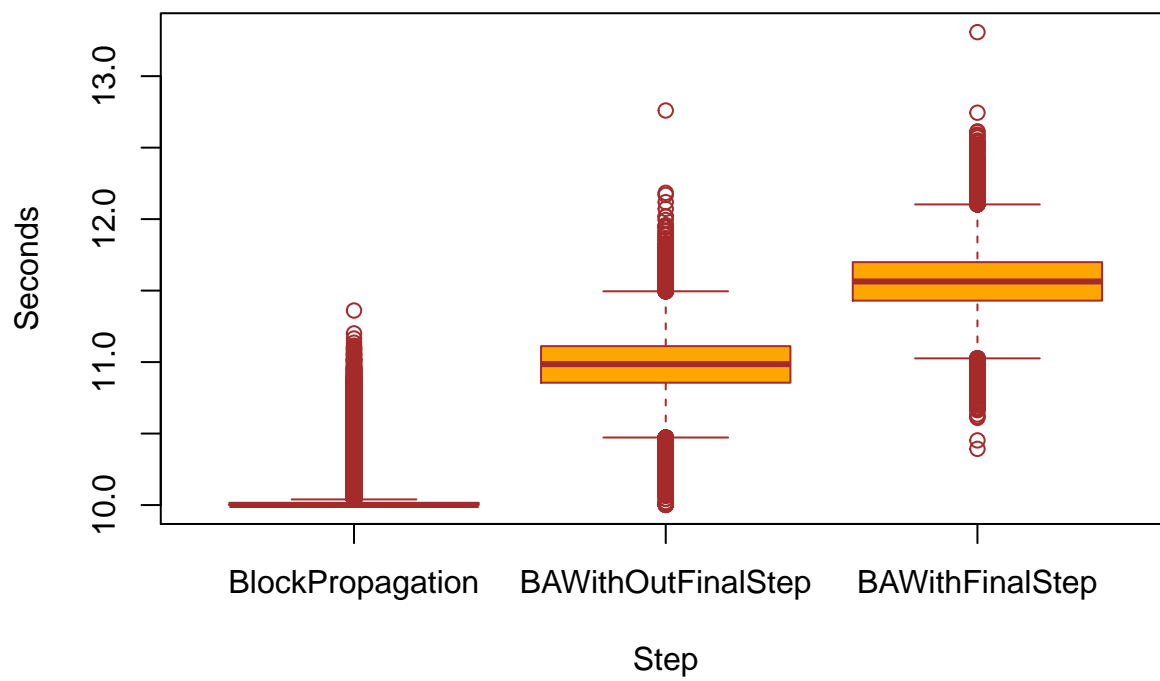

Two nucs are connected over LAN. 50 Algorand process is deployed per nuc. Each process is using Trickle to cap the upload and download bandwidth 20Mbps each. TC rules are not used to add delay! Block and Vote validation disabled. Block size is 1MB.

Dataset name is **2020-12-04\_15:29:49**

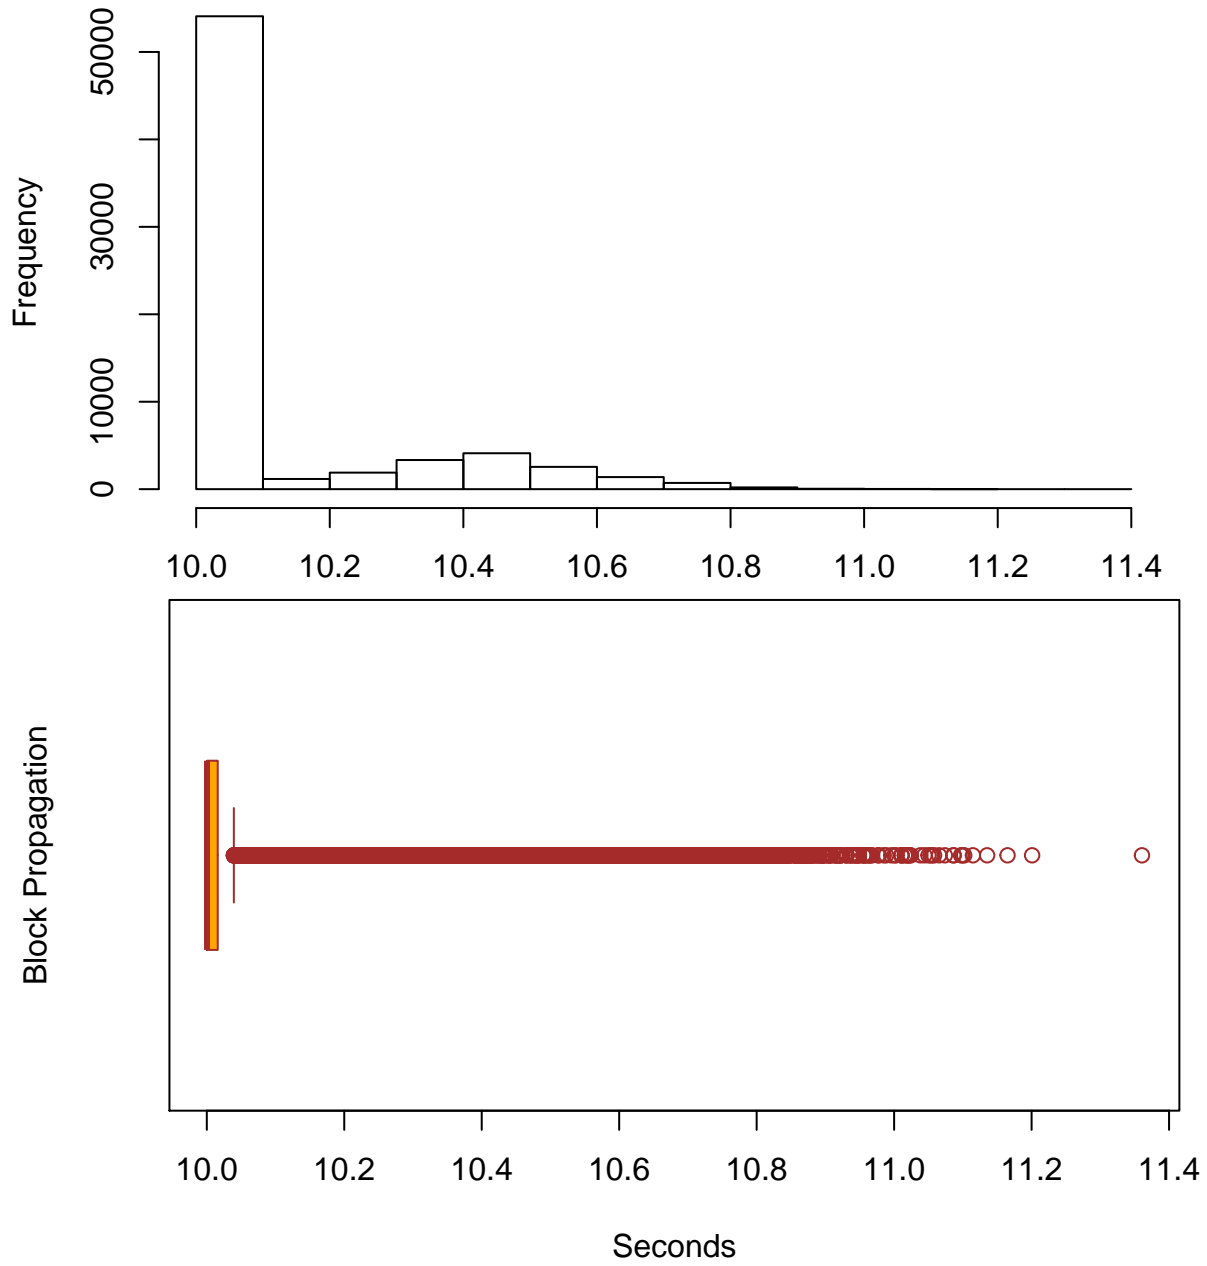

The number of rows is **138998**

Maximum round number is **1389**

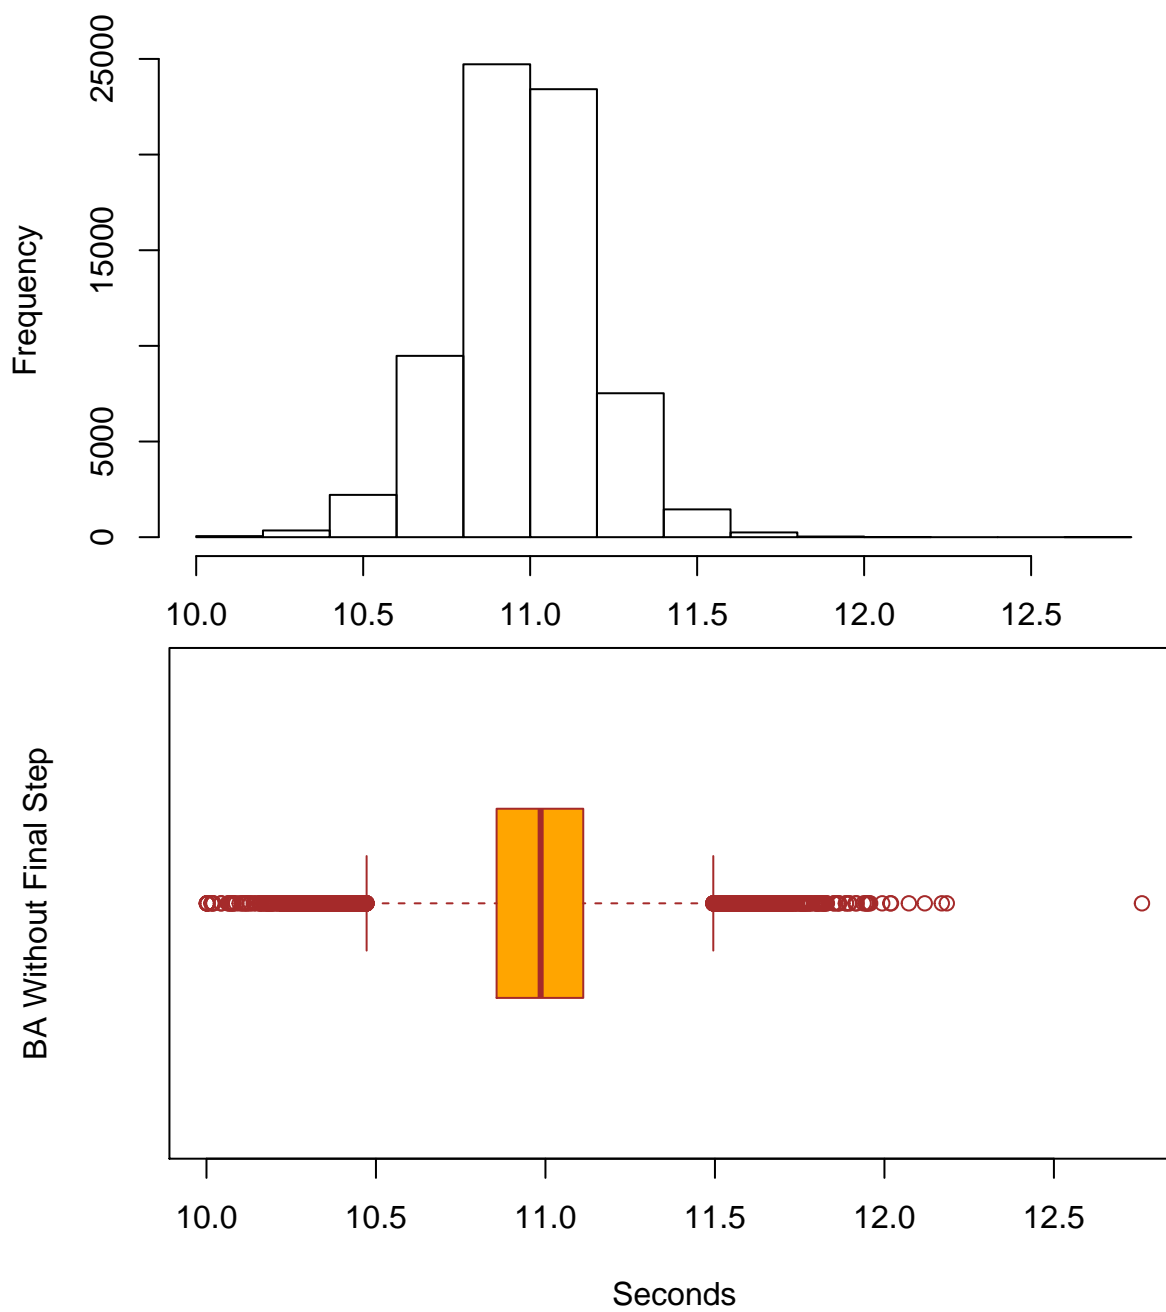

## Overall Results

## Block Propagation Statistics

## BA Elapsed Time Without Final Step Statistics
